IoMT Healthcare Monitoring Report

Patient ID: P-CAOT-2026-001
Device ID: IoMT-Device-ECG-001
Session ID: Session-CAOT-ECC-0001

This PDF report is generated as a healthcare payload sample for testing the proposed CAOT-ECC context-aware one-time hybrid cryptographic framework. The report includes typical IoMT measurements transmitted from wearable healthcare sensors to a hospital cloud system.

Measurement	Value	Status
Heart Rate	78 bpm	Normal
SpO2	97%	Normal
Body Temperature	36.8 C	Normal
Blood Pressure	118/76 mmHg	Normal
ECG	Normal sinus rhythm	Stable

Security Evaluation Note: This report can be encrypted using AES-256 with a one-time session key derived from SHA-256 over the medical payload, timestamp, nonce, device identity, and session identifier. The session key is protected using ECC and authenticated using ECDSA.
